

Opportunity to Participate: MNO Community-Based **WATER QUALITY MONITORING**

The Métis Nation of Ontario (MNO) is pleased to launch the first ever MNO-led water quality monitoring pilot program. The program will monitor the effects of climate change and pollution on important waterbodies in the MNO's regional historic communities.

The program is:

- **A land-based program where Métis citizens and youth can participate in monitoring important waterbodies to the Métis community.**
- **An opportunity for Métis citizens to learn basic water quality monitoring techniques.**
- **An opportunity for citizens to connect and share knowledge while spending time on the land.**

Our goal is to create a network of [Métis Guardians](#) across the MNO who will have a vital role in protecting their traditional territories.

Interested in Participating?
